

Konsta Perttilä

I am currently finishing my ICT Engineering studies at Metropolia University of Applied Sciences. My major is Mobile Solutions. I have 190 credits, and I'm working on my last course two days a week until mid-December, so I could work on three weekdays and weekends. I can start working full-time from mid-December. I would also love to find a topic for my thesis from you.

PROJECTS

I've got experience in multiple projects, including mobile and web applications and websites, the most notable being the emotion tracker, which was made in collaboration with Nokia to follow their employee's well-being at work. All of my projects can be found on my Github (link in contacts).

WORK HISTORY

Installer 01/2020 - Current

Niemi Services

- My work is mostly customer service, consisting of a day to a few months long furnituring projects, goods distribution and moving homes and companies
- Working as a part of and leading 2 to 6-person teams in projects has taught me to be as much of a team player as a self-driven employee who can understand the whole picture and find a solution to problems quickly.

Kitchen installer 01/2016 - 10/2019

Lakeuden asennuspalvelu

- Work involved installing kitchen furniture, toilet fixtures and wardrobes for large institutions.
- The work required initiative, and for example, I was responsible for a couple of larger school furnishing projects, which developed my project management skills.

EDUCATION

ICT Engineering, 2021 - Current

Metropolia University of Applied Sciences

- I have 190 credits, and I am currently working on my last course Thursdays and Fridays. Left after that are my thesis and two internships.
